## SUBJECT INDEX

Acrylic copolymer, p. 442
Advanced tactical aircraft, p. 232
Asphyxic fire effluents, p. 109
Atmosphere toxicity, p. 195
Atomic oxygen resistance, p. 137
Atria smoke problem, p. 329
Atrium fire, p. 3
Calculated LOI, p. 137
Capillary gas chromatography, p. 394
Carbon gasification, p. 407
Carbon monoxide, p. 394
Carbon vapor combustion, p. 407
Carboxyhemoglobin, pp. 195, 394
*Casuarina littoralis,* p. 131
Char residue, p. 66
Chlorotrifluoroethylene (CTFE), p. 232
Chromium chloride, p. 184
Cigarette ignition test, p. 52
Clashing conductors, p. 80
CO generation, p. 407
Combat vehicles, pp. 232, 242
Combustion efficiency, p. 407
Combustion toxicology, pp. 109, 485, 512
Compartment fires, p. 172
Composites, pp. 255, 271, 296, 308, 407, 421
  anisotropy, p. 66
  armor, p. 147
  combustion behavior of, p. 421
  combustion products, p. 421
  fiber, p. 147
  flame spread of , p. 421
  flexural modulus, p. 255
  high performance, p. 66
  high temperature, p. 271
  residual strength, p. 255
  short kevlar fiber, p. 66
  Spectra®, p. 147
  standard testing of, p. 421
  structural performance, p. 255
  thermal profile, p. 255
Cone calorimeter, p. 296
Corrosion, p. 407
Cotton upholstery fabric, p. 350
  alkali metal ions, p. 350
  flammability, p. 350
  smoldering ignition, p. 350
Cyanide, p. 195
Cyclophosphazenes, p. 320
Degradation kinetics, p. 156
Delayed-onset mortality, p. 109
Diesel fuel, p. 242
DIN 53436 combustion method, p. 109
Electrical arc apparatus, p. 407
Electrical arc combustion, p. 407
Engineering plastics, p. 371
External radiation, p. 308
Extinction index, p. 131
FED model, p. 109
Fire, pp. 210, 242, 255
  extinguishing agents, p. 242
  growth, p. 172
  Halon/composite, p. 421
  propagation, p. 87
  propagation index, p. 421
  retardant materials, p. 66
  testing, p. 271
  zone models, pp. 3, 329
Flame
  extinction, p. 407
  instability, p. 407
  resistance, p. 147
  retardant materials, pp. 320, 442
  retardant matrix, p. 147
  retardant plasticizers, p. 66
  spread and dripping, pp. 66, 287, 308, 421
Flammability, pp. 66, 210, 271, 287, 296, 308, 407
Flammability apparatus, p. 407
Forest fires, p. 80
Forest litter, p. 80
Glass/vinyl ester, p. 255
Halogen-containing polymers, p. 66
Halon 1301, p. 407

*(continued)*

Subject Index *(continued)*
Heat release rate, pp. 87, 308, 407
Hot spot, p. 80
Hydraulic fluid, p. 242
  nonflammable, p. 232
  type C, p. 394
Hydrocarbon generation, p. 407
Hydrogen chloride (HCl), pp. 459, 485, 512
  acute effects, pp. 459, 485, 512
  long-term effects, pp. 459, 485, 512
  pulmonary function, pp. 459, 485, 512
  respiratory response, pp. 459, 485, 512
Ignition propensity, pp. 52, 131
Interliners, p. 87
Irritant fire effluents, p. 109
Kapton®, p. 156
$LC_{50}$-determination, p. 109
Liquid crystal polymer, p. 296
Magnesium hydroxide, p. 147
Manganese chloride, p. 184
Mass optical density, p. 421
Mathematical CO-loading model, p. 394
Mathematical modeling, pp. 109, 172
Metal filled organic coatings, p. 371
Mist fireball explosion, p. 242
Modified polyphenylene oxide (m-PPO), p. 210
Molten copper, p. 80
MTL torch flame test, p. 147
NO FIRE® refractory coating, p. 147
OSU calorimeter, p. 87
Oxygen index, pp. 66, 271, 442
Oxygen plasma resistance, p. 137
Polyacrylonitrile, p. 442
  burning rate, p. 442
  limiting oxygen index, p. 442
  pressed powder, p. 442
Poly(arylene ether phosphine oxide)s, p. 137
Polycarbonate, p. 371
Polyimide-siloxanes, p. 137
Poly(methyl methacrylate), p. 184
Poly(para-phenylene-benzobisoxazole) (PBO), pp. 156, 296
Polyphenylene oxide, p. 371
Poly(phosphazenes), p. 320
  cyclolinear, p. 320
  cyclomatrix, p. 320
Polyurethane foam, p. 87
Polyvinyl chloride (PVC), pp. 485, 512
  acute effects, pp. 485, 512
  long-term effects, pp. 485, 512
  pulmonary function, pp. 485, 512
  respiratory response, pp. 485, 512
Powder packs, p. 242
Primaset™ resin, p. 147
Pyrolysis, p. 287
Radiant flux, p. 87
Radiant heating, p. 271
Refractory coating, p. 147
Respiratory minute volume, p. 394
Room fires, p. 172
Sensory irritants, p. 394
Siloxane-epoxies, p. 137
Smoke
  density, p. 66
  extraction design, p. 329
  filling and extraction, pp. 3, 329
  generation, p. 147
  spread, p. 172
  toxicity, p. 172
Spectra® armor, p. 147
Surface effects, p. 131
Synergistic/additive toxicity, p. 109
TGA/FTIR, pp. 156, 184
Thermal conductivity detector, p. 394
Thermal degradation, pp. 156, 184, 350, 394
Thermal ignition, p. 80
Thermal response parameter, p. 421
Thermogravimetric analysis, p. 66
Thermo-oxidative degradation, p. 156
Thermoplastic polyurethane, p. 66
Torch flame test, p. 147
Toxic gas generation, pp. 147, 195
Upholstery fabrics, pp. 87, 350

Wetting agents, p. 131
Zinc, pp. 210, 371
Zinc borate, pp. 210, 371
Zinc oxide, p. 371

## AUTHOR INDEX

Allen, C. W., p. 320
Anzueto, A., pp. 459, 485, 512
Bates, S. C., p. 271
Beck, C., p. 255
Beer, R. S., p. 184
Benrashid, R., pp. 210, 371
Brown, J., p. 308
Chin, H. B., p. 147
Chow, W. K., pp. 3, 329
Cleary, T., p. 308
Connell, J. W., p. 137
Daenens, P., p. 394
Dapp, T., p. 255
Delichatsios, M. A., p. 287
Ferm, D. J., p. 210
Finnerty, A. E., p. 242
Fuh, S., p. 156
Gallagher, J. A., p. 87
Gee, J. W., p. 52
Hall, M. E., p. 442
Hergenrother, P. M., p. 137
Hinderer, R. K., pp. 459, 485, 512
Horrocks, A. R., p. 442
Hughes, K. C., p. 131
Jang, K. O., p. 350
Jones, J. C., pp. 80, 131
Jones, W. W., p. 172
Kaplan, H. L., pp. 459, 485, 512
Khan, M. M., p. 407
Kim, P. K., p. 296
Kutty, S. K. N., p. 66
Kwon, Y. D., p. 147
Lem, K. W., p. 147
Leone, J. T., p. 184
Lewis, L. S., p. 52
Li, H. L., p. 147
Macaione, D. P., p. 421
Mittleman, M. L., p. 184
Morikawa, T., p. 195
Morton, M. J., p. 52
Nando, G. B., p. 66
Nelson, G. L., pp. 210, 371
Nestor, T. B., p. 52
Nielsen, C. A., p. 156
Ohlemiller, T., p. 308
Okada, T., p. 195
Pauluhn, J., p. 109
Pierini, P., pp. 156, 296
Polyanski, S., p. 242
Prevorsek, D. C., p. 147
Reznichenko, J., p. 350
Sato, K., p. 195
Shields, J., p. 308
Smith, J. G., Jr., p. 137
Solomon, P. R., p. 271
Song, Z., p. 350
Sorathia, U., p. 255
Switzer, W. G., pp. 459, 485, 512
Tewarson, A., pp. 407, 421
Townsend, D. E., p. 52
Turner, M. J., p. 131
Van Brocklin, C., p. 232
Van Dam, J., p. 394
Wessling, R., p. 296
Wilkie, C. A., p. 184
Wong, W. K., pp. 3, 329
Yanai, E., p. 195
Yeh, K., p. 350
Zhang, J., p. 442
